Skills

Python, JavaScript, PHP, SQL, C
Django, Flask, CodeIgniter, Node.js, Express.js
MySQL, PostgreSQL, MongoDB, SQLite
AWS (EC2, RDS, VPC, CloudWatch), Docker, Linux
Git, GitHub, Postman, VS Code, Power BI, Excel
REST APIs, API Design, ETL, JWT, Debugging

Personal

Languages: English, Hindi, Marathi
Location: Chh. Sambhajinagar, Maharashtra, India

Achievements

RHCSA (Red Hat Certified System Administrator)
Selected Participant, Smart India Hackathon (2024, 2025)
Bridge Captain – Alumni Community, MIT Sambhajinagar

Profile

Software Developer with experience in backend and frontend development, data analysis, and software testing. Skilled in building scalable applications, developing REST APIs, and designing efficient database systems using Django and PHP CodeIgniter. Experienced in ETL processes, MySQL, PostgreSQL, and using AWS and Linux for deployment, testing, and performance optimization.

Projects

SkillMart – Digital Services Marketplace (Live)
Node.js, Express.js, MongoDB, HTML, CSS, JavaScript
Engineered a full-stack digital marketplace supporting buyer, seller, and admin roles with complete service, order, and review workflows. Built RESTful APIs with JWT-based authentication and role-based access control, implemented cart and checkout functionality, and streamlined MongoDB queries to improve performance and data handling efficiency.

Adaptive Edge Detection using PSO
Python, Flask, OpenCV, TensorFlow, PSO
Built an adaptive edge detection system integrating Canny and Sobel operators with Particle Swarm Optimization (PSO) for dynamic parameter tuning. Created backend APIs for image upload and processing, improving detection accuracy and handling variations across different image conditions.

Vendor Risk Management System
Django, Django REST Framework, JWT, PostgreSQL
Built RESTful APIs for vendor onboarding, risk assessment, and data workflows. Applied JWT-based authentication and role-based access control to secure endpoints and ensure controlled data access, improving system reliability.

Courier Management System
PHP, Laravel, MySQL
Built a multi-role logistics platform supporting admin, merchant, and delivery personnel. Implemented shipment lifecycle management with unique tracking IDs and real-time status updates, improving operational efficiency and data retrieval performance.

AWS RDS Deployment
AWS (RDS, VPC, CloudWatch), MariaDB
Deployed and configured a managed MariaDB database using AWS RDS within a secure VPC environment. Established controlled connectivity through security groups, monitored performance using CloudWatch, and ensured high availability and reliable database operations.

Experience

Software Development Intern – JBB Technologies Jan 2026 – Present
Built and maintained 10+ RESTful APIs using Python and Django, improving response time by approximately 20% through query optimization. Integrated database operations to ensure efficient data flow across system components. Performed API testing using Postman and resolved 15+ production-level issues, enhancing system stability and reliability.

Data Analyst Intern – Oasis Infobyte Aug 2025 – Dec 2025
Analyzed datasets using Python (Pandas, NumPy) and SQL, processing 10K+ records to extract actionable insights. Created 3+ dashboards using Power BI and Excel, improving visualization and supporting data-driven decision making.

Education

- B.Tech in Computer Science Engineering, MIT Sambhajinagar (2022 – 2026)
  CGPA: 9.53

Certifications

IBM Data Analyst
Oracle DBMS Foundation
Cloud Computing
RHCSA – Red Hat Certified System Administrator
NPTEL – Data Structures
